**Objectives:** To familiarize the students with the advances in welding and casting technology

AE-314: Advances in Welding & Casting					Contact Hours
<b>Unit-1</b>	<b>CASTING DESIGN</b> Heat transfer between metal and mould — Design considerations in casting – Designing for directional solidification and minimum stresses - principles and design of gating and risering system.				8
<b>Unit-2</b>	<b>CASTING METALLURGY</b> Solidification of pure metal and alloys – shrinkage in cast metals – progressive and directional solidification — Degasification of the melt-casting defects – Castability of steel, Cast Iron, Al alloys , Babbitt alloy and Cu alloy.				6
<b>Unit-3</b>	<b>RECENT TRENDS IN CASTING AND FOUNDRY LAYOUT</b> Shell moulding, precision investment casting, CO <sub>2</sub> moulding, centrifugal casting, Die casting, Continuous casting, Counter gravity low pressure casting, Squeeze casting and semisolid processes. Layout of mechanized foundry – sand reclamation – material handling in foundry pollution control in foundry – Computer aided design of casting.				6
<b>Unit-4</b>	<b>WELDING METALLURGYAND DESIGN</b> Heat affected Zone and its characteristics – Weldability of steels, cast iron, stainless steel, aluminium, Mg, Cu, Zirconium and titanium alloys – Carbon Equivalent of Plain and alloy steels Hydrogen embrittlement – Lamellar tearing – Residual stress – Distortion and its control. Heat transfer and solidification - Analysis of stresses in welded structures – pre and post welding heat treatments – weld joint design – welding defects – Testing of weldment.				8
<b>Unit-5</b>	<b>RECENT TRENDS IN WELDING</b> Friction welding, friction stir welding – explosive welding – diffusion bonding – high frequency induction welding – ultrasonic welding – electron beam welding – Laser beam welding –Plasma welding – Electroslag welding narrow gap, hybrid twin wire active TIG – Tandem MIG- modern brazing and soldering techniques – induction, dip resistance, diffusion processes – Hot gas, wave and vapour phase soldering.				8
<b>Unit-6</b>	Overview of automation of welding in aerospace, nuclear, surface transport vehicles and under water welding.				6
	<b>Total</b>				42

**Course Outcomes**

CO1	To understand Design considerations in casting
CO2	To understand the solidification of casting of different metals.
CO3	To understand recent trends in different types of casting and foundry layouts
CO4	To understand welding in terms of metallurgy and its design to minimize defects.
CO5	To understand recent trends in different types of welding.
CO6	To understand automation of welding in different environment.
